

US Census Workers Are Coming to Your Neighborhood

September 9, 2019

Beginning in August, U.S. Census Bureau employees started walking through neighborhoods across the country, including LA County, to check unverified addresses. This address verification work is on-going and will end on October 18, 2019.

Census workers are currently knocking on doors and asking a few simple questions to verify the address of a residence and to take note of any additional living quarters on the property for inclusion in the census. This effort could be taking place in your neighborhood right now!

How do you identify a legitimate U.S. Census Bureau employee? Look for the following: a U.S. Census badge, a U.S. Census branded messenger bag, and a U.S. Census branded laptop. If you have questions about Census-related activity in your neighborhood call 1-800-923-8282 to speak with a local Census Bureau representative. Learn more about address canvassing:
